COUNCIL FOR TOBACCO RESEARCH--U.S.A., INC.
Research Grants

This agency is dedicated to support the investigation of the fundamental relationship between tobacco use and human health. Areas of research interest include cancer, cardiovascular disease, and chronic pulmonary ailments. The council supports basic biomedical and clinical research concerning the etiology or pathogenesis of diseases alleged to be related to tobacco use, notably cancer, heart and circulatory diseases and chronic lung ailments. Awards are made for one year at a time, renewable up to a total of three years. The applicant must submit to the council a brief preliminary outline (three to four pages) of the study for which support is sought. If the council approves the project, a formal application can be submitted.

Harmon C. McAllister, Ph.D.
Research Director
Council for Tobacco Research--U.S.A., Inc.
900 Third Avenue
New York, NY 10022
